THE LIBRARY OF THE

TREASURY DEPARTMENT

United States Customs Service

Office of the Collector

Port of Juneau, Alaska,

February 10, 1923.

Complying with urgent requests from commercial and shipping interests in Alaska and the United States for information relative to the commerce of the Territory, the following statistics for 1921 have been compiled from reports of this office and those of the Department at Washington. This report has been issued annually for a number of years and the demand for the information contained herein seems to warrant its continuance.

While it is to be regretted that the year 1921 did not show an advance in the commerce of Alaska, yet the balance of trade continues in our favor.

The outstanding decrease in value of shipments to Alaska occurred from the fact that but few salmon canneries were in operation; a decline in all forms of lode mining, especially that of copper, and the completion of the government railroad, with the consequent decrease in shipments of construction materials.

The decrease of both copper production and development, owing to the low price of metals, also contributed to the loss in shipments from Alaska, over 1920, as did the decline in production and value of canned fish, fish and whale oils, fertilizers, lead ore, marble, palladium and platinum. It is an encouraging feature however to note that the decline shown in shipments to the United States is due more to falling values, rather than tonnage.

The value of Alaska's mineral output in 1921 was approximately sixteen million dollars, as compared with twenty three millions in 1920. The inactivity of Alaska mining is but the reflection of the world-wide depression of the industry, and not primarily caused by local conditions.

In the following table a portion of the Exports Foreign is in the nature of intransit commerce and not considered as a part of the actual trade of the Territory.

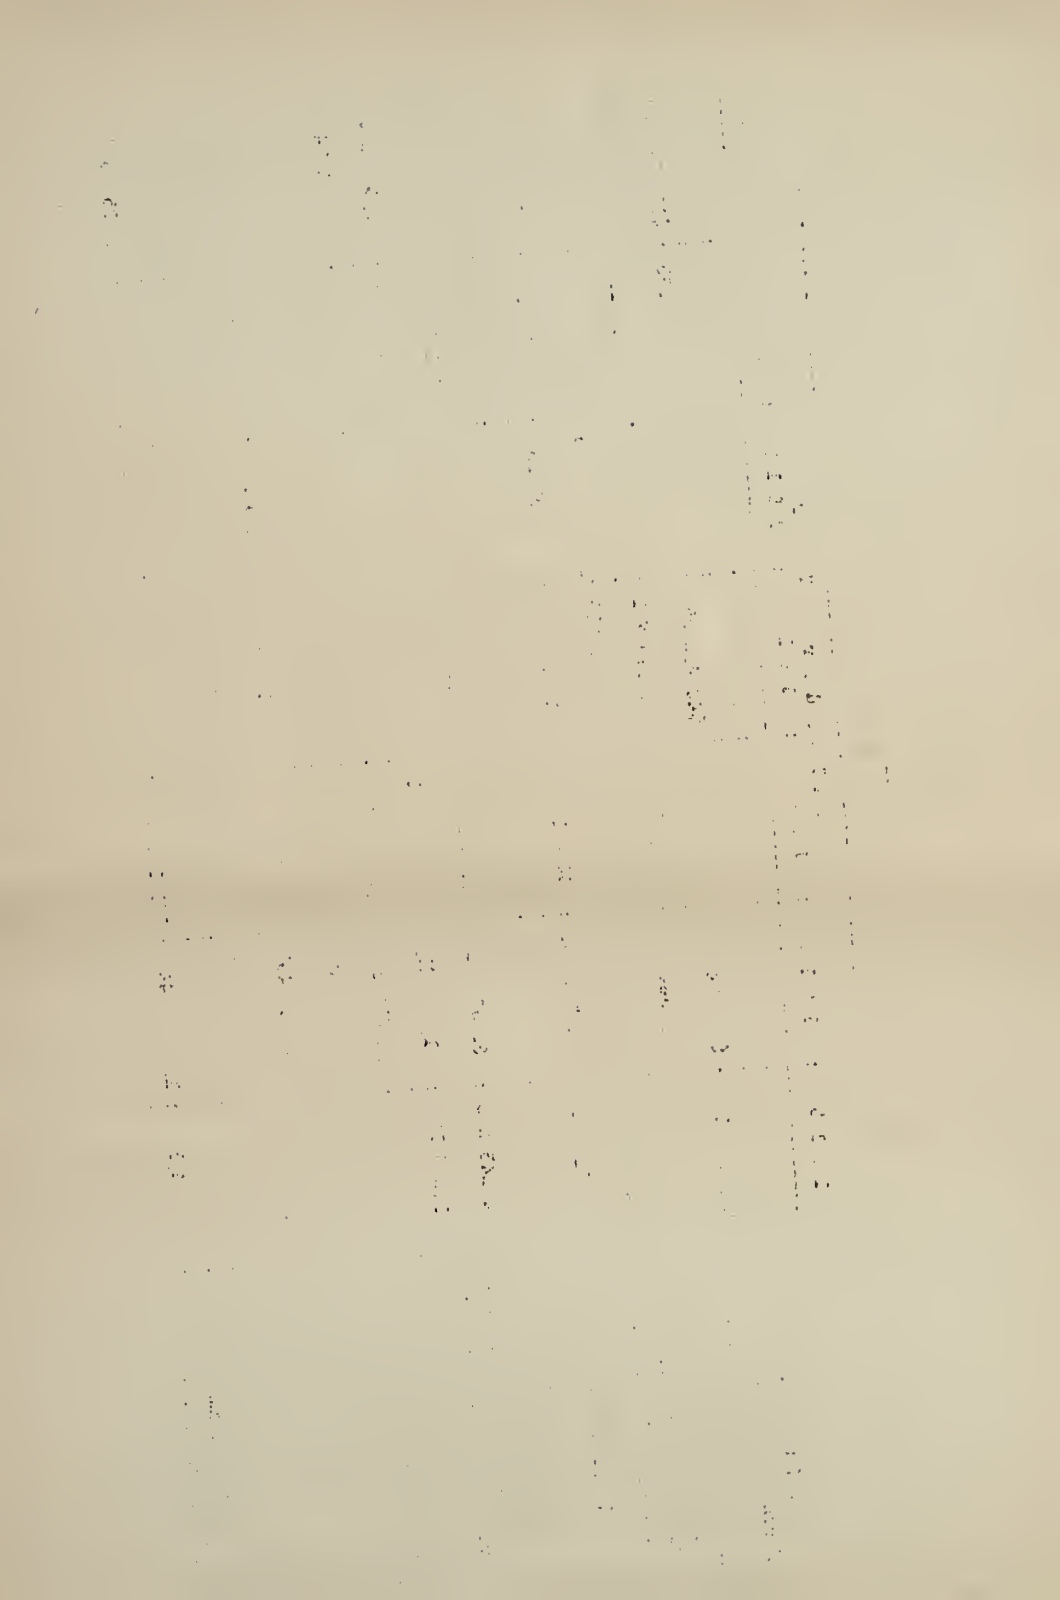

## COMMERCE OF ALASKA

	1915	1916	1917	1918	1919	1920	1921
Calendar Year							
<b>- Imports -</b>							
Merchandise from the United States .....	\$23,293,168	\$30,834,793	\$39,838,168	\$40,412,253	\$37,476,232	\$36,876,855	\$19,274,215
Merchandise from foreign ports .....	500,519	1,544,132	1,196,195	1,175,701	1,449,362	1,512,118	935,013
Gold and silver from foreign ports .....	4,222,620	2,936,018	2,397,237	37,605	31,665	29,500	0
Total imports .....	28,017,307	35,314,993	44,431,600	41,625,564	38,957,259	38,418,473	20,209,228
<b>- Exports -</b>							
Merchandise to the United States .....	24,245,272	62,507,311	76,651,968	75,036,578	60,473,623	60,929,241	36,916,924
Merchandise and gold and silver to foreign ports .....	1,225,130	1,873,013	3,093,590	1,315,976	1,578,986	1,539,735	1,478,272
Domestic gold and silver to United States .....	16,090,411	16,332,117	14,939,440	8,997,655	8,636,139	7,413,751	7,350,142
Foreign gold and silver to United States .....	3,296,012	3,909,509	2,008,864	83,360	6,332	38,695	0
Total exports .....	54,856,815	84,622,450	96,693,862	85,423,566	70,695,080	69,911,432	45,745,338
Grand total of imports and exports .....	82,874,122	119,937,443	141,125,462	127,049,132	109,652,339	108,329,895	65,954,566

381  
54435  
1921

091,1000 -8.0.0.0 1261 421119.6

To the corresponding items in the table upon the following page should be added the content of copper ore exported from Southeastern Alaska to British Columbia for treatment:

Tons ore	Copper content	Gold	Silver	Total Value
730	167,900 lbs.	204 oz.	1417 oz.	
	\$20,987	\$4,088	\$765	\$25,840

And to arrive at the total value of fish products the following exports foreign should be added to the appropriate items in the table:

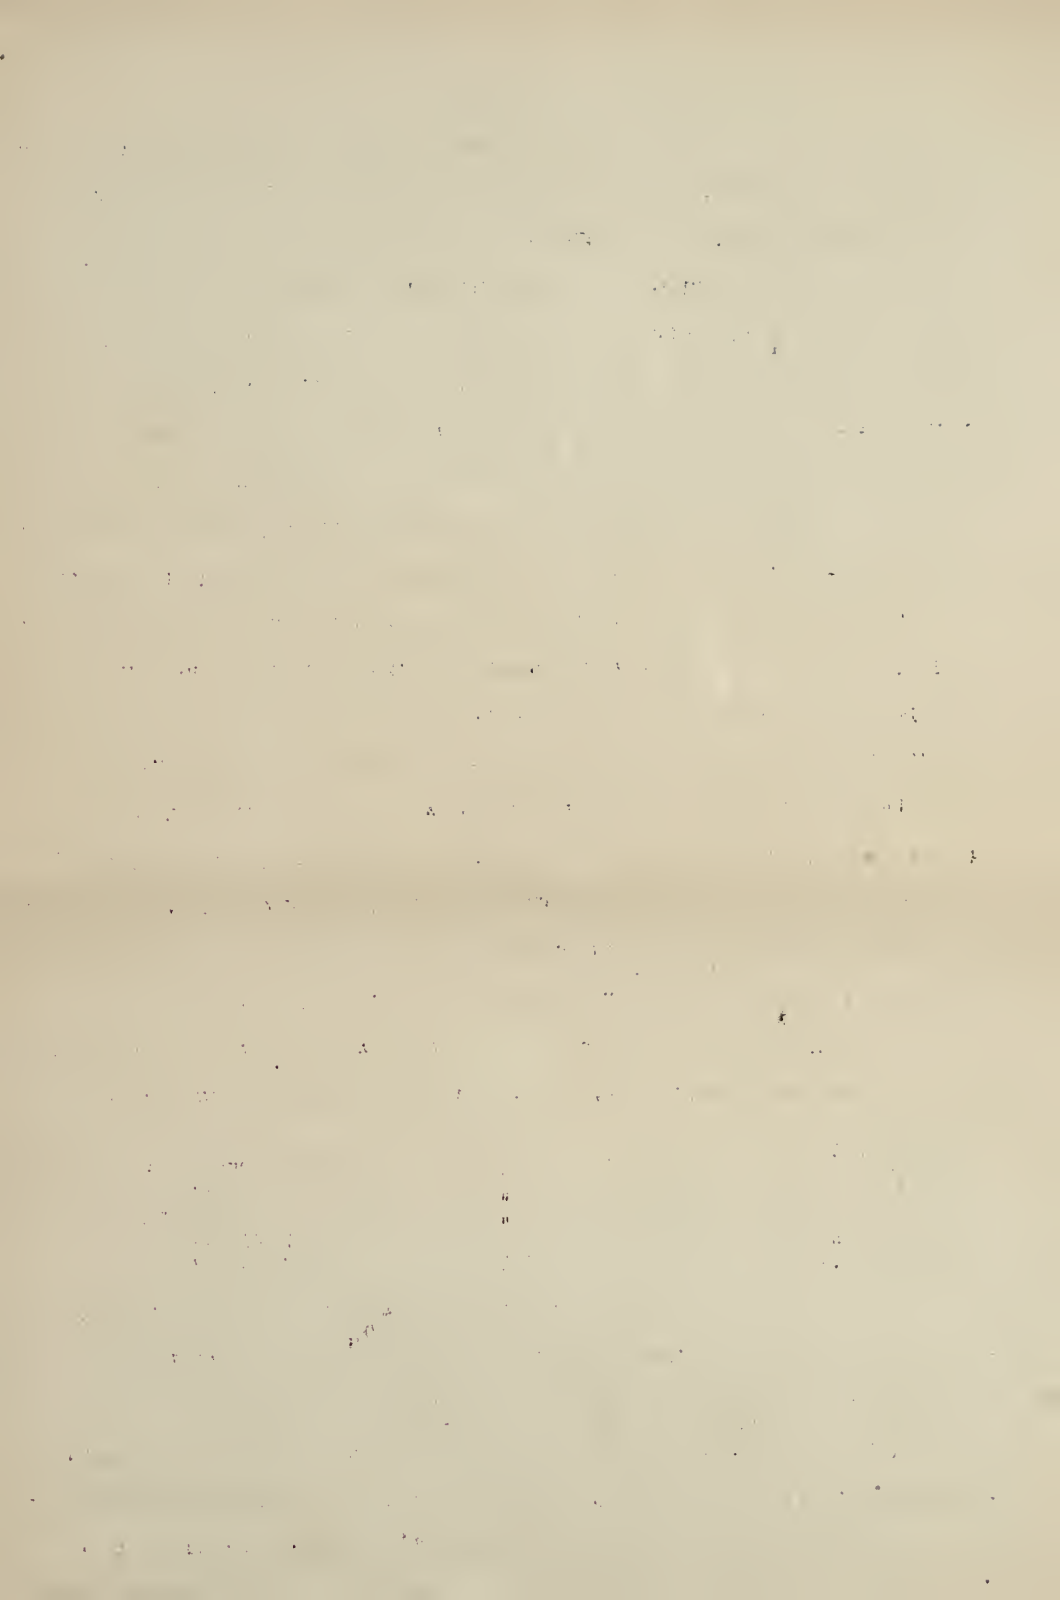

Salmon, fresh	Lbs.	4,267,828	\$314,178
Halibut, fresh	"	6,841,830	587,568
Cod	"	32,400	1,660
Herring	"	327,000	3,660
Crab, canned	"	1,200	<u>300</u>
			907,366

When the sum of these items is added to the total shipments from Alaska to the United States, the resulting value of products shipped is \$45,200,272.

The greatest loss of the year's commerce is in fish products. Indications are, however, that a large number of salmon canneries will operate in 1922. A study of the table covering shipments of products to the United States shows a substantial gain in pickled fish, due to the growth of the herring industry. The items of fresh salmon, shrimp and gypsum also show gains over 1920. Hope is renewed in the mining industry. New lode mines in the Juneau, Sitka mining districts expect to start crushing ore in 1922, and a general continuation of activity in gold quartz prospecting throughout the Territory. A revival of the placer mining of the Interior, due to cheaper cost of transportation and supplies, is looked for. An increase of over a half million dollars in gold and silver shipments from the Fourth division took place in 1921.

During the last year the first Alaska wood-pulp was manufactured and shipped to the United States. While the value was too small to make a separate item in the list of commodities, nevertheless it marked the beginning of the development of one of Alaska's greatest natural resources. The outlook for the early development of pulp and paper manufacturing industry is encouraging.

The travel movement as shown in the statement of arrivals and departures, which are about equal, again shows a lack in growth of population, but indicates the present population is of a permanent nature.

The following table of passenger movement for six years indicates the travel, by regularly established routes, to and from the District of Alaska and the Yukon Territory.

The Eagle and Dawson movement shows the local frontier travel, which must not be considered with the general account, as the greater number of these passengers arrived at or departed from Ketchikan or St. Michael, and have been accounted for in the figures for those ports.
